

Spring / Summer / Autumn / Winter

The family can live healthily, comfortably, and safely in "TATAMI" mat room.

Enjoy Japanese-style

"TATAMI" mat!

本当に理想的!?

畳のお部屋は、

(Let's study about "TATAMI")

The "TATAMI" mat breathes. The indoor humidity is controlled, and the poisonous substance is adsorbed. It is said, "Air cleaner of nature".

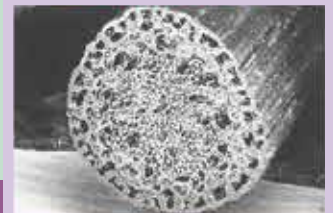

Generally, the "TATAMI" mat keeps 40% the indoor humidity.

Moisture is breathed in if humidity rises, and moisture is discharged if lowering. They are decreasing of the number of natural materials to our life. The "TATAMI" mat holds out when control the indoor humidity. When humidity is too high, the vermin may be generated. Let's sometimes have the specialist inspect the moisture of the "TATAMI" mat.

The "TATAMI" mat breathes in bad air in the room.

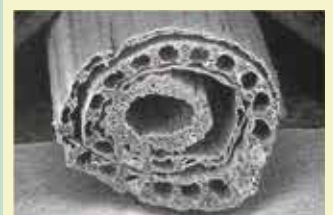

The "TATAMI" mat adsorbs Nitrogen dioxide and VOC, etc. that negatively affect man. It has power to make the air of the room clean. The smell of the rush has the effect of looking like the forest relaxation. Man's effect of the relaxation can be expected. Therefore, it can be said that life with the Japanese-style room is the most ideal for modern people.

The mystery of the humidity adjustment is here.

● Section of rush

The diameter of the rush is about 1.5mm. The section becomes like the beehive.

● Section of straw

One per one of the straw is a cave the inside, and becomes like the straw.

There are a lot of advantages of the "TATAMI" mat.
